Response

1. The response filed 1/7/2008 has been received and made of record.
2. After further reviewing the claims 16-37 a new grounds of rejection is made here(see below).
3. Claims 1-15 are allowed.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 16-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Specifically, claim 16 appears to be drawn to a system consisting solely of software component (i.e., filter program) and is therefore non-statutory subject matter.

Dependent claims 17-22 are also rejected as inheriting the same deficiency through their dependency. Appropriate correction is required.

4. Claims 23-37 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The subject matter "article of manufacture" in claims 23-37, are computer programs per se not tangible embodied on a computer readable medium (see paragraph 0046 of the specification).

Dependent claims 18-37 are also rejected as inheriting the same deficiency through their dependency. Appropriate correction is required.

6. To overcome this type of 101 rejection the claims need to be amended to include only the physical computer media.

5. Claims 16-37 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.
